

Caldan at PaintExpo 2010

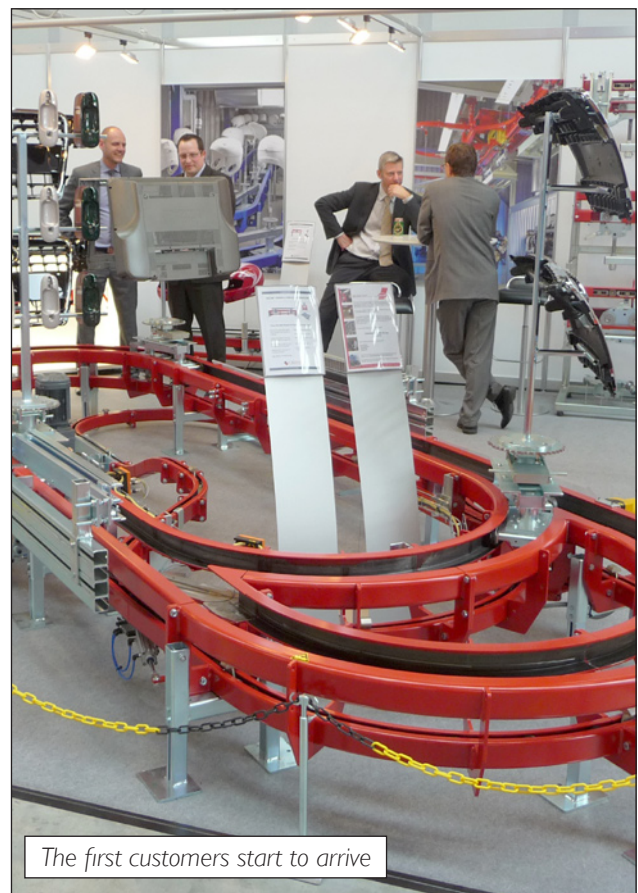

The Caldan exhibition team shortly before the opening

The P&F100 up and running

Once again Caldan participated at PaintExpo in Karlsruhe - the internationally leading trade fair for suppliers of industrial coatings technology. On the stand the modified P&F100 was fully operational, and among others jigs with auto grills from Audi helped attract attention.

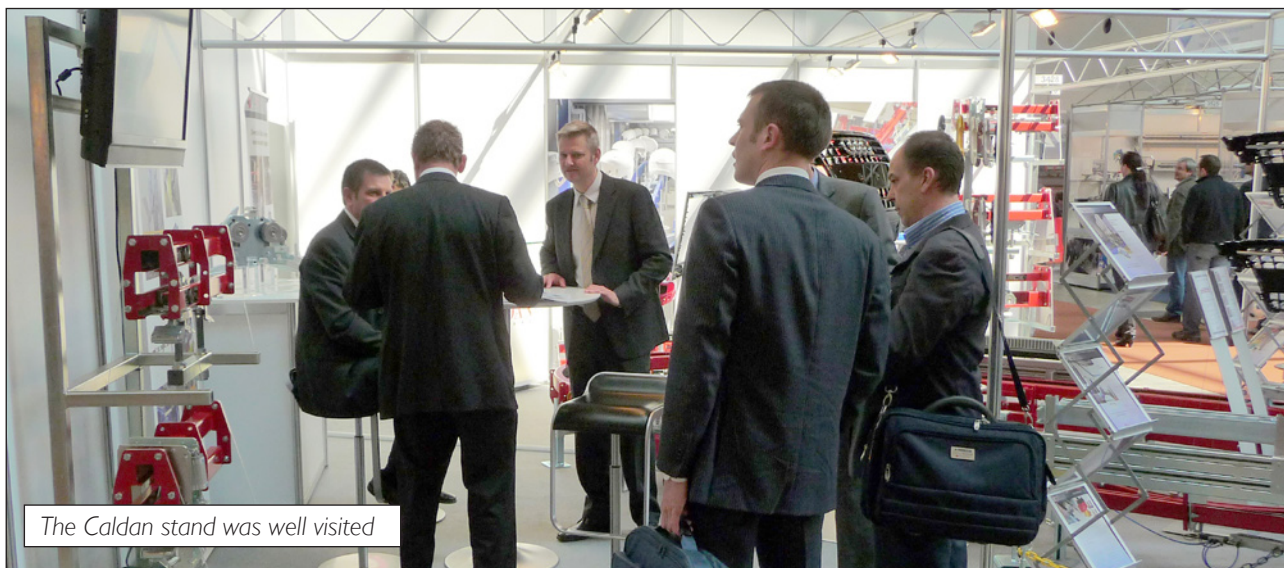

During the 4 exhibition days existing customers were greeted, but also a lot of new contact were established and future projects discussed. After the show sales manager Germany, Frank Berg summed the event up with the following comments: "A lot of our existing customers came to Karlsruhe. We also managed to establish highly valuable

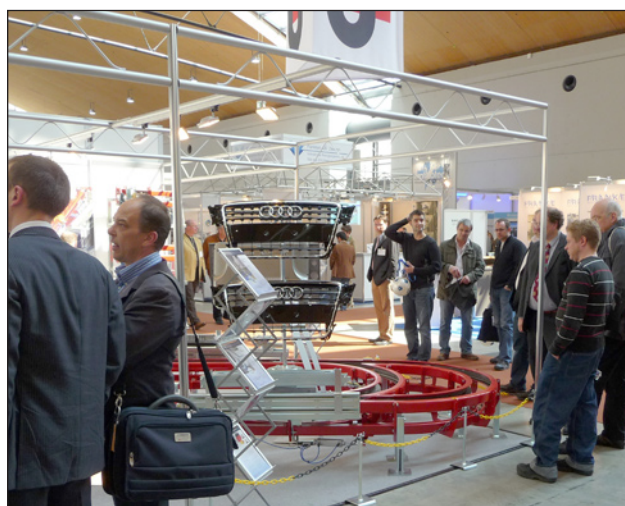

The first customers start to arrive

new contacts, and had a fair amount of new leads. Especially Eastern Europe, Russia in particular, and China looks like very promising markets for Caldan in future. Establishing a sales office in Moscow, and having our new Russian sales representative on our stand therefore turned out to be of great importance to us."

Caldan at PaintExpo 2010...

The Caldan stand was well visited

PaintExpo - fast facts:

- 327 international exhibitors
- Exhibitor numbers increased by 14%
- Visitor numbers grew by 8%
- Total number of visitors - 6400
- 20.5% of the exhibitors came from outside of Germany, representing 15 different countries.

Foreign visitors who journeyed from a total of 62 countries made up roughly 19,5% of the total number. This growth, as well as increasing levels of internationalism, highlights PaintExpo's undisputed top ranking as an industry event for industrial coating technology.
